

# Wycliff Kimutai

## GIS Software Engineer

✉ kimutaiwycliff90@gmail.com ☎ +254716522948 📍 Nairobi, Kenya 🔗 Wycliff Kimutai

### PROFILE

Back in 2019, while working on a road upgrade project, I discovered a passion for geospatial data analysis and quality control. Since then, I've developed GIS desktop applications, conducted spatial analysis for renewable energy projects, and performed topographic surveys. Currently, as a Senior GIS Desktop Developer at Konza Silicon Company Limited, I focus on ensuring data quality and transforming complex data into actionable insights. In my free time, I enjoy automating geoprocessing tasks, contributing to open-source geospatial projects, and exploring advancements in data analytics. When not working with data, you can find me hiking, reading about tech trends, or spending time with family and friends.

### EDUCATION

<b>M.Sc. Data Analytics</b> <i>KCA University</i>	01/2022 – present Nairobi, Kenya
<b>Software Engineering</b> <i>ALX</i>	02/2022 – 05/2023
<b>B.Sc. Geomatics Engineering and Geospatial Information Systems</b> <i>Jomo Kenyatta University of Agriculture and Technology</i> Grade: First Class Honours	09/2015 – 04/2021 Juja, Kenya
<b>CCNA Routing and Switching</b> <i>Cisco Networking Academy</i>	07/2017 – 01/2018

### PROFESSIONAL EXPERIENCE

<b>Senior GIS Desktop Developer &amp; Front-End Developer</b> <i>Konza Silicon Company Limited</i> <ul style="list-style-type: none"><li>• <b>Front-End Developer (09/2023 – present)</b><ul style="list-style-type: none"><li>- Transitioned to the front-end department to focus on web development using the Angular framework.</li><li>- Designed and developed user interfaces for various web applications.</li><li>- Collaborated with backend developers to integrate APIs and optimize performance.</li><li>- Ensured responsive design and cross-browser compatibility for all web applications.</li><li>- Implemented best practices in UI/UX to enhance user experience.</li></ul></li><li>• <b>Senior GIS Desktop Developer (09/2022 – 09/2023)</b><ul style="list-style-type: none"><li>- Developed and maintained high-quality GIS desktop applications for Windows and Linux.</li><li>- Created QGIS plugins and wrote Python scripts for geoprocessing automation.</li><li>- Conducted spatial data analysis using pandas and geopandas.</li><li>- Built web applications and data dashboards using Python.</li><li>- Managed, maintained, and rendered spatial data using Geoserver and POSTGIS.</li><li>- Deployed applications using Docker Swarm, Kubernetes.</li><li>- Developed web maps for data visualizations using folium and dash libraries.</li></ul></li></ul>	09/2022 – present Nairobi, Kenya
<b>Geospatial Engineer</b> <i>Bell Power International</i> <ul style="list-style-type: none"><li>• Conducted spatial analysis to identify optimal locations for renewable energy installations.</li><li>• Collected, managed, and analyzed spatial data to support project planning and monitoring.</li><li>• Utilized GIS to assess the environmental impact of proposed energy projects.</li><li>• Developed automated workflows to improve operational efficiency and data analysis accuracy.</li><li>• Implemented GIS solutions to optimize the planning and management of energy infrastructure.</li></ul>	02/2022 – 09/2022 Nairobi, Kenya

**Lead Surveyor***KAAD, Somalia*07/2021 – 02/2022  
Puntland, Somalia

Project: Garaad-Galkayo-Tuurdibi road project. (309Kms)

- Successfully conducted topographic surveys and design reviews for highway construction.
- Established control points and benchmarks for accurate road construction using static survey techniques.
- Successfully mapped and analyzed terrain to identify potential challenges and opportunities.
- Ensured alignment with project timelines and milestones through efficient survey planning and execution.
- Implemented precise land surveys to establish boundaries and right-of-way considerations.
- Developed comprehensive survey reports to guide decision-making in the early stages of the road project.

**Engineering Survey Intern***Kenya National Highways Authority (KeNHA)*08/2019 – 02/2020  
Busia, Kenya

Project: Busia- Malaba road project.

- Assisted in conducting precise land surveys for road construction projects, contributing to accurate project planning.
- Collaborated with the surveying team to create detailed topographic assessments for road alignments.
- Contributed to the determination of boundaries, ensuring legal compliance in road project planning.
- Acquired hands-on experience in CAD applications, supporting the creation of road design layouts.
- Participated in data analysis tasks, providing valuable insights for decision-making in the road project.
- Engaged in the preparation of survey reports and documentation for project milestones. Levelling.

**Engineering Survey Intern***Kenya Rural Roads Authority (KERRA)*07/2018 – 12/2018  
Bomet, Kenya

Project: Road upgrade of Darajasita-Chebole-Dikirr road

- Design of road structures like culverts and bridges.
- Road design and alignment.
- Road Leveling.
- Topographical mapping.

**PROJECTS**

---

**Virtual reference station (VRS) in Kenya**

07/2020 – 12/2020

*University Final Year Project*

- Investigated and reported on the performance of the Kenyan VRS concept as an extension of the GPS Real-Time-Kinematic (RTK) survey technique to provide reliable information on accuracy, precision, and reliability.
- Assessed the reliability of the Muya VRS network through detailed testing of accuracy, precision, initialization times, and coverage extent. Collected and processed multiple measurements from test sites within, on, and outside the network.
- Demonstrated that the Muya VRS system is at least comparable to classic RTK in accuracy, precision, and initialization times, with greater robustness in coverage extents.
- Provided valuable insights for existing and potential GPS users, aiding informed decision-making in positioning activities.

SKILLS

Programming

Python, JavaScript, Django, Express, React, Angular, R, PyQt,

Surveying

Engineering Surveys, GPS RTK and Static Survey

Cloud

AWS (Amazon Web Services): Terraform, EC2, ECS, S3

Databases

MySQL, PostgreSQL, MongoDB

Technical Skills

ArcGIS, ArcGIS Pro, QGIS, Google Earth Engine, Geoserver, Kubernetes, ERDAS, AutoCAD, ENVI,

Soft

Time management, Communication, Adaptability, Attention to detail, Teamwork, Problem-solving
